Reasons for Allowance

1. This application has been examined.
2. The amendment filed 1/8/07 has been entered.
3. The following is an examiner's statement of reasons for allowance: The amendment filed 1/8/07 places the application into condition for allowance by incorporating the allowable features into the remaining rejected claims and by rendering the objected claims into independent form. Thus claim 47 (tangible computer readable medium) has the operator agent to determine a media mode of an incoming call incorporated in the telephony customizing interface with shell program. Claim 79 (method) contains the branding graphic and pane inherency features. Claim 81 (method) uses associated application programs using selected default user interface elements. Claim 84 (tangible computer readable medium) has the default pane programs and state change communication. Claim 85 (method) has the message area for the specific messages, and adds the custom panes. Claim 87 (computer implemented method) has the runtime indication of the interface element to be added and via the programming interface accepts the indication. Claim 91 (tangible computer readable medium) has the call slip area, the internet browser to access the online directory service, and adds the custom panes. The features combined in the

independent claims, especially in view of applicant's comments from 8/25/06, are not set forth in the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
